PREPARATION OF FISH TONIC

1. Take residue of fish
2. Grind the residue of fish with mortar and pestle and put it in a pot of 1 liter
3. Add ½ liter of honey
4. Put a lid on leaving some space and do not close too tightly
5. Keep it for 11 days
6. Sometimes you need to open the pot and let out the air
7. After 11 days, use a sieve to filter the liquid
8. Then keep it in a place for treatment use 1 spoon of that liquid with 1 liter of water
9. Then use a spray pump for treatment
